

MITHUN A

Second-year Computer Science & Engineering student (8.55 CGPA) with hands-on experience building open-source CLI utilities, data-intensive web platforms, and responsive frontends. Demonstrates solid software engineering fundamentals across multithreaded systems, Linux environment automation, network protocols, and data structures.

Area of Interest: Cloud Computing • Networking

🔗 github.com/Mithun202008

📍 Tamil Nadu, India

TECHNICAL SKILLS

PROGRAMMING

C, C++, Python, Java, JavaScript, SQL, Kotlin, Embedded C

WEB & SOFTWARE

HTML, CSS, JavaScript, React.js, TypeScript, Tailwind CSS, Node.js, Express.js, Flask, REST APIs

DATABASES

MySQL, MongoDB

TOOLS & PLATFORMS

Git, GitHub, VS Code, Linux, Fedora, Kali Linux, VMware, VirtualBox

CORE CS

Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

OTHER

Cloud Computing, Cybersecurity, Ethical Hacking, Burp Suite

EDUCATION

Chennai Institute of Technology

B.E. Computer Science and Engineering

2025 – 2029 | 2nd Year

CGPA: 8.55 / 10

CERTIFICATIONS

[Credly](#) ➔

Python Essentials 1

Cisco Networking Academy
Issued January 2026

MongoDB Basics

MongoDB University
Verified Credential

PROJECTS

PROXC — Proxy Validation & Analysis Engine Python • Multithreading • Linux

- Engineered an open-source command-line tool for concurrent validation and health analysis of **HTTP, HTTPS, SOCKS4, and SOCKS5** proxies with configurable timeouts and custom target URL validation.
- Designed robust data processing features including **automatic CSV field detection**, multi-format file input (CSV/TXT/LST), real-time streaming output, and structured working-proxy export.
- Architected automated testing suites and cross-platform distribution packages, releasing **Debian/Kali Linux packages**, PyPI installation, Linux/macOS shell scripts, and Windows PowerShell installers.

RPA Monitor — Web Data Handling Platform JavaScript • DOM Optimization • Web Dev

- Developed a data-heavy web application simulating and processing **50,000+ data records** directly within the browser interface to model real-world enterprise RPA workflows.
- Implemented client-side data management strategies to ensure responsive UI rendering, efficient state updates, and smooth navigation through large datasets without performance degradation.

Aetheris AI — Interactive Modern Web Interface React • TypeScript • Vite • Tailwind CSS

- Designed and built a sleek modern web frontend utilizing **component-based React architecture**, TypeScript type-safety, and responsive layout patterns.
- Focused on UI design aesthetics, micro-interactions, and visual hierarchy to deliver an engaging user experience across desktop and mobile viewports.

OPEN SOURCE & ENGINEERING

- Open-Source Tool Maintenance:** Independently built and published PROXC as a fully documented open-source utility with automated testing pipelines, cross-platform installers, and Debian packaging.
- Community Contribution:** Submitted PROXC to the Kali Linux Bug Tracker for consideration as a new tool within the pentesting ecosystem.

COMPETITIONS & ACTIVITIES

- Participated and advanced to the first round of the **Frontend Battle** competition conducted by IIT Bhubaneswar.
- Participated and advanced to the first round of the **Chandigarh Police Hackathon**.
- Participated in a competitive **Capture The Flag (CTF)** cybersecurity challenge.
- Solved **370+ algorithmic problems on LeetCode**, demonstrating consistent practice in Data Structures & Algorithms.
